This is the Afrika Korps Operazione E scenario, the invasion of Egypt by the Italian Army in Fall 1940.

The Italians invade on September 13, with initial success. Historically they stopped and dug in around Sidi Barani, for lack of fuel and supplies. Commonwealth forces then dug in to protect Mersa Matruh.

- The Commonwealth forces are small but well led by General O’Connor, with better tanks and the RAF has stronger power.
- The Italians led by Graziani have lower morale, poor tanks, and limited mobility. But they have large numbers and, if able to move forward, have the means to take ground in Egypt.

The scenario starts right with the initial invasion, where the Commonwealth forces are dispersed against a strong and concentrated Italian force. Can the Italians advance into Egypt and threaten Alexandria? Can the Commonwealth stop and then crush the Italians, further moving deep into Libya?

Be careful of the supply lines for the Commonwealth, as early success can outrun your supply!

The games Cards and Events allow full replay ability thanks to the numerous various situations that they create on the environmental, diplomatic, military, or political fields.
